MEMORANDUM FOR: Deputy for Operations, OSA

SUBJECT : Additional Weapon for [redacted]

25X1

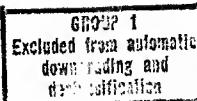

25X1 REFERENCE : A. [redacted] dated 4 January 1967
 B. [redacted] dated 5 January 1967
 C. [redacted] dated 9 January 1967
 D. [redacted] dated 9 January 1967
 E. [redacted] dated 10 January 1967
 F. Memo for C/MD/OSA from INTEL/O/OSA
 (OSA-0105/67) dated 10 January 1967
 G. Memo for Life Support Section,
 from ASD/R&D/OSA (IDEA-0332/67) dated
 27 April 1967
 H. Memo for D/O/OSA from ASD/R&D/OSA
 (IDEA-0405/67) dated 31 May 1967
 I. Memo for D/O/OSA from ASD/R&D/OSA
 (IDEA-0533/67) dated 29 August 1967

25X1

1. On 4 January 1967 [redacted] Detachment
Commander, requested a small caliber pistol be provided
for self defense use by [redacted] A .32 caliber revolver
was specifically suggested (Ref. A).

2. Following an exchange of cables (Refs. B and C) to define the specific requirements, Intelligence Division contacted the ordinance engineers in the Technical Support Division, DDP and obtained their recommendations as to a suitable weapon. The specific requirement was for a small compact handgun suitable for use in self defense [redacted] 25X1 [redacted] without extensive weapons training. It was additionally stipulated that the weapon must be lightweight, easy to operate, reliable, and rugged.

25X1 25X1
3. On 9 January TSD's recommendation, the German Walther PP 7.65 mm (.32 caliber) automatic was submitted to [redacted] (Ref. D) and accepted the following day (Ref. E).

4. A requisition for these weapons was submitted to Materiel Division on 10 January (Ref F). Intelligence Division completed its portion of the requirement in six days.

25X1
5. On 30 January Materiel Division received the weapons. Shortly thereafter, one pistol was delivered to [redacted] ASD/R&D/OSA, for holster design and selection of the best location and means of securing same on harness or outer garment.

25X1 25X1
6. Three months later (27 April 1967) [redacted] requested the Life Support Section, [redacted], headed by [redacted] to fabricate suitable holsters and "select locations where a holster could be attached allowing immediate access without affecting comfort, mobility, pressure suit or parachute functions and without interfering with cockpit controls" (Ref. G). One pistol was shipped to [redacted] for use in completing these tasks.

7. Ref. H, memo from [] to the Deputy
for Operations dated 31 May, claimed [] detachment
really desired a .25 caliber Colt automatic pistol.

[redacted] has a personal weapon of this type). According to the memo [redacted] Life Support recommended the adoption of this weapon vice the Walther 7.65 and that it be attached to the flying boot. It was stated "the weapon selected is too large to be safely and comfortably located on the pilot's boot, coverall or pressure suit." [redacted] concurred.

3. Three months later, on 29 August 1967, the final report from [redacted] Life Support (Ref. I) was submitted along with [redacted] concurrence recommending a weapon the size of a .25 caliber Colt or Browning automatic be utilized and that it be attached to the flying boot. The Walther 7.65 mm automatic was dismissed as too large and heavy for placement on the boot or elsewhere.

9. TSD regards the Colt and Browning .25 caliber automatics as unsuitable weapons. The ammunition lacks both penetrating and shock ability. The weapons, designed to be carried in a lady's handbag, are inaccurate, tend to misfire, and are easily damaged.

10. It is recommended that the methods used by combat pilots in Southeast Asia to carry their bulky service .38 caliber revolvers and a variety of personal weapons be determined and adopted for use by [redacted] in carrying the Walther 7.65, a much smaller weapon, or that the pistols which we have had on hand for six months
